1 Identification

· Product identifier
  · Trade name: ChlorCid™, ChlorCid™ V, ChlorCid™ Surf
  · Article number: 66004, 69004, 1005564
  · Index number: SDS 34-001.11
  · Application of the substance / the mixture Professional Dental Sodium Hypochlorite Solution

· Details of the supplier of the safety data sheet
  · Manufacturer/Supplier:
    Ultradent Products Inc.
    505 W. Ultradent Drive (10200 S)
    South Jordan, UT 84095-3942
    USA
    onlineordersupport@ultradent.com
  · Information department: Customer Service
  · Emergency telephone number:
    CHEMTREC (NORTH AMERICA) : (800) 424-9300
    (INTERNATIONAL) : +(703) 527-3887

2 Hazard(s) identification

· Classification of the substance or mixture
  GHS05 Corrosion
  Eye Dam. 1 H318 Causes serious eye damage.

  GHS07
  Skin Irrit. 2 H315 Causes skin irritation.

· Label elements
  · GHS label elements
    Medical Devices are exempt from the labeling requirements of the Globally Harmonized System (GHS).

· Hazard pictograms GHS05

· Signal word Danger

· Hazard-determining components of labeling:
  Sodium Hydroxide
  Sodium Hypochlorite

· Hazard statements
  Causes skin irritation.
  Causes serious eye damage.

· Precautionary statements
  Wash thoroughly after handling.
  Wear protective gloves / eye protection / face protection.
  If on skin: Wash with plenty of water.
  If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do.
  Continue rinsing.
  Immediately call a poison center/doctor.
  Specific treatment (see on this label).
  Take off contaminated clothing and wash it before reuse.

(Contd. on page 2)
Trade name: ChlorCid™, ChlorCid™ V, ChlorCid™ Surf

If skin irritation occurs: Get medical advice/attention.

- Classification system:
  - NFPA ratings (scale 0 - 4)
    - Health = 3
    - Fire = 0
    - Reactivity = 0
  - HMIS-ratings (scale 0 - 4)
    - Health = *3
    - Fire = 0
    - Reactivity = 0

- Other hazards
  - Results of PBT and vPvB assessment
    - PBT: Not applicable.
    - vPvB: Not applicable.

3 Composition/information on ingredients

- Chemical characterization: Mixtures
- Description: Mixture of the substances listed below with nonhazardous additions.

- Dangerous components:
  - 7681-52-9 Sodium Hypochlorite ≤3%
  - 1310-73-2 Sodium Hydroxide ≤2.5%
  - 9003-01-4 Polyacrylic Acid ≤2.5%

4 First-aid measures

- Description of first aid measures
  - General information:
    First-Aid Providers: Avoid exposure to blood or body fluids. Wear gloves and other necessary protective clothing. Dispose of contaminated clothing and equipment as bio-hazardous waste. National Capital Poison Center in the United States can provide assistance if you have a poison emergency and need to talk to a poison specialist. Call 1-800-222-1222. Ensure that medical personnel are aware of the material(s) involved and take precautions to protect themselves. First aider needs to protect himself. Immediately remove any clothing soiled by the product.
    - After inhalation:
      Supply fresh air. If breathing is difficult, give oxygen. If not breathing, give artificial respiration. WARNING! It may be hazardous to the person providing aid to give mouth-to-mouth resuscitation when the inhaled or ingested material is toxic, infectious or corrosive. Do not use mouth-to-mouth resuscitation if victim ingested or inhaled the substance; induce artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device. Call a doctor immediately.
    - After skin contact:
      Immediately wash with water and soap and rinse thoroughly. If skin irritation continues, consult a doctor.
5 Fire-fighting measures

- Extinguishing media
- Suitable extinguishing agents: Use fire fighting measures that suit the environment.
- Special hazards arising from the substance or mixture
  Contact with combustible or organic materials may cause fire.
  Contact with metals may evolve flammable hydrogen gas.
- Advice for firefighters
- Protective equipment:
  Wear fully protective suit.
  As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear.

6 Accidental release measures

- Personal precautions, protective equipment and emergency procedures
  Do not touch damaged containers or spilled material unless wearing appropriate protective clothing.
  Ensure adequate ventilation.
  Keep people at a distance and stay on the windward side.
  Wear protective equipment. Keep unprotected persons away.
- Environmental precautions:
  Prevent further leakage or spillage if safe to do so. Prevent product from entering drains. Do not allow material to contaminate ground water system. See Section 12 for additional Ecological information.
  Prevent entry into basements or confined areas.
  Do not flush into surface water or sanitary sewer system.
  Do not allow to penetrate the ground/soil.
  Should not be released into the environment.
  Do not allow to enter sewers/ surface or ground water.
- Methods and material for containment and cleaning up:
  Stop leak if you can do it without risk. Neutralize with Sodium Thiosulfate or Sodium Bisulfite. Dilute with water.
  Absorb spill with inert material (e.g. vermiculite, dry sand or earth).
  Use appropriate tools to put the spilled material in a suitable chemical waste disposal container. Clean contaminated surface thoroughly.
  Absorb with liquid-binding material (sand, diatomite, acid binders, universal binders, sawdust).
  Use neutralizing agent.
  Dispose contaminated material as waste according to item 13.
Trade name: ChlorCid™, ChlorCid™ V, ChlorCid™ Surf

- Reference to other sections
  See Section 7 for information on safe handling.
  See Section 8 for information on personal protection equipment.
  See Section 13 for disposal information.

7 Handling and storage

- Handling:
  - Precautions for safe handling
    Do not inhale vapor or mist.
    Avoid release to the environment
    Do not ingest.
    Avoid contact with eyes, skin, and clothing.
  - Information about protection against explosions and fires: No special measures required.

- Conditions for safe storage, including any incompatibilities

- Storage:
  - Requirements to be met by storerooms and receptacles:
    Keep at temperature not exceeding 33 °C/95 °F. It can be stored at temperatures between 2 and 30 deg. C. Store away from incompatible materials. Store in a segregated and approved area.
    Store only in the original receptacle.
    Provide ventilation for receptacles.
  - Information about storage in one common storage facility: Not required.
  - Further information about storage conditions:
    Store in a cool place.
    Protect from exposure to the light.
    See product labelling.
    Keep receptacle tightly sealed.
  - Specific end use(s) Professional Dental Sodium Hypochlorite Solution

8 Exposure controls/personal protection

- Additional information about design of technical systems: No further data; see item 7.

- **Additional information:** The lists that were valid during the creation were used as basis.
- **Exposure controls**
- **Personal protective equipment:**
- **General protective and hygienic measures:**
  - Do not eat or drink while working.
  - When using do not smoke.
  - Observe good industrial hygiene practices.
  - Keep away from foodstuffs, beverages and feed.
  - Immediately remove all soiled and contaminated clothing.
  - Wash hands before breaks and at the end of work.
  - Avoid contact with the skin.
  - Avoid contact with the eyes and skin.
- **Breathing equipment:**
  - Vapor respirator
  - Be sure to use an approved/certified respirator or equivalent.
- **Protection of hands:**
  - Protective gloves
  - The glove material has to be impermeable and resistant to the product/ the substance/ the preparation.
  - Due to missing tests no recommendation to the glove material can be given for the product/ the preparation/ the chemical mixture.
  - Selection of the glove material is based on consideration of the penetration times, rates of diffusion and the degradation
  - **Material of gloves**
    - The selection of suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer. As the product is a preparation of several substances, the resistance of the glove material can not be calculated in advance and has therefore to be checked prior to the application.
  - **Penetration time of glove material**
    - The exact breakthrough time has to be found out by the manufacturer of the protective gloves and has to be observed.
- **Eye protection:**
  - Face protection
  - Tightly sealed goggles
- **Body protection:**
  - Chemical resistant protective suit.
  - Boots

### 10. Stability and reactivity

#### Reactivity

Decomposition of sodium hypochlorite takes place within a few seconds with the following salts: ammonium acetate, ammonium carbonate, ammonium nitrate, ammonium oxalate and ammonium phosphate.

Primary amines and sodium hypochlorite react to form normal chloroamines, which are explosive.

Chloramine gas may be evolved when ammonia and bleach are mixed.

Mixing sodium hypochlorite with ammonia, acids, detergents or organic matter (e.g urine, feces, etc.) will release chlorine gas.

Chlorination of ethyleneimine with sodium hypochlorite gives the explosive compound 1-chloroethyleneimine.

Evolves flammable hydrogen gas on contact with metals.

It may be a fire risk in contact with organic materials.

Contact with combustible materials (wood, paper, oil, clothing, etc.) may cause fire.
Stable at normal conditions. Unstable in air unless mixed with sodium hydroxide. Slowly decomposes on contact with air. Decomposed by carbon dioxide from air. Decomposed by hot water. Sensitive to light. Exposure to light accelerates decomposition.

- **Chemical stability**
- **Thermal decomposition / conditions to be avoided:** Stable at normal conditions.
- **Possibility of hazardous reactions** Hazardous polymerization does not occur.
- **Conditions to avoid**
  - Heat
  - Releases chlorine when heated above 35 °C.
  - Light
  - Air

- **Incompatible materials:**
  - Incompatible with ammonium acetate, ammonium carbonate, ammonium nitrate, ammonium oxalate, and ammonium phosphate, primary amines, phenyl acetonitrile, ethyleneimine, methanol, acidified benzyl cyanide, formic acid, urea, nitro compounds, methylcellulose, cellulose, aziridine, and ether.
  - Acids
  - Metals
  - Amines
  - Combustible Materials
  - Organic materials
  - Reducing Agents
  - Ammonia

- **Hazardous decomposition products:**
  - When heated to decomposition it emits toxic fumes.
  - Hydrogen chloride gas
  - Sodium oxides
  - Chlorine
  - Hydrogen chloride (HCl)

### 11 Toxicological information

- **Primary irritant effect:**
  - **on the skin:** Irritant to skin and mucous membranes.
on the eye: Strong irritant with the danger of severe eye injury.
Sensitization: No sensitizing effects known.
Additional toxicological information: The product shows the following dangers according to internally approved calculation methods for preparations:
Irritant Carcinogenic categories
IARC (International Agency for Research on Cancer)
9003-01-4 Polyacrylic Acid 3
NTP (National Toxicology Program)
None of the ingredients is listed.
OSHA-Ca (Occupational Safety & Health Administration)
None of the ingredients is listed.

12 Ecological information
Toxicity
Aquatic toxicity:
1310-73-2 Sodium Hydroxide
EC50 40.38 mg/l (Water Flea)
9003-01-4 Polyacrylic Acid
EC50 174 mg/kg (daphnia)
Persistence and degradability No further relevant information available.
Behavior in environmental systems:
Bioaccumulative potential No further relevant information available.
Mobility in soil No further relevant information available.
Additional ecological information:
General notes:
Water hazard class 1 (Self-assessment): slightly hazardous for water
Do not allow undiluted product or large quantities of it to reach ground water, water course or sewage system.
Must not reach bodies of water or drainage ditch undiluted or unneutralized.
Results of PBT and vPvB assessment PBT: Not applicable.
vPvB: Not applicable.
Other adverse effects No further relevant information available.

13 Disposal considerations
Waste treatment methods
Recommendation: Must not be disposed of together with household garbage. Do not allow product to reach sewage system.
Uncleaned packagings:
Recommendation: Disposal must be made according to official regulations.
### 14 Transport information

- **UN-Number**
  - DOT, IMDG, IATA UN1719

- **DOT proper shipping name**
  - Caustic alkali liquids, n.o.s. (Sodium hydroxide, Hypochlorite solutions)

- **IMDG, IATA proper shipping name**
  - CAUSTIC ALKALI LIQUID, N.O.S. (SODIUM HYDROXIDE, HYPOCHLORITE SOLUTION)

- **Transport hazard class(es)**
  - **DOT**
    - Class 8 Corrosive substances
    - Label 8

- **IMDG, IATA**
  - Class 8 Corrosive substances
  - Label 8

- **Packing group**
  - DOT, IMDG, IATA II

- **Environmental hazards:**
  - Not applicable.

- **Special precautions for user**
  - Warning: Corrosive substances

- **Hazard identification number (Kemler code):**
  - 80

- **EMS Number:**
  - F-A,S-B

- **Segregation groups**
  - Alkalis

- **Segregation Category**
  - A

- **Segregation Code**
  - SG22 Stow "away from" ammonium salts
  - SG35 Stow "separated from" SGG1-acids

- **Transport in bulk according to Annex II of MARPOL73/78 and the IBC Code**
  - Not applicable.

- **Transport/Additional information:**
  - **DOT**
    - Quantity limitations
      - On passenger aircraft/rail: 1 L
      - On cargo aircraft only: 30 L

- **IMDG**
  - Limited quantities (LQ) 1L
  - Excepted quantities (EQ) Code: E2
    - Maximum net quantity per inner packaging: 30 ml
    - Maximum net quantity per outer packaging: 500 ml

15 Regulatory information

· Safety, health and environmental regulations/legislation specific for the substance or mixture
  · Sara
    · Section 355 (extremely hazardous substances):
      None of the ingredients is listed.
    · Section 313 (Specific toxic chemical listings):
      None of the ingredients is listed.
    · TSCA (Toxic Substances Control Act):
      All components have the value ACTIVE.
    · Hazardous Air Pollutants
      None of the ingredients is listed.
    · Proposition 65
      · Chemicals known to cause cancer:
        None of the ingredients is listed.
      · Chemicals known to cause reproductive toxicity for females:
        None of the ingredients is listed.
      · Chemicals known to cause reproductive toxicity for males:
        None of the ingredients is listed.
    · Chemicals known to cause developmental toxicity:
      None of the ingredients is listed.
  · Carcinogenic categories
    · EPA (Environmental Protection Agency)
      None of the ingredients is listed.
    · TLV (Threshold Limit Value established by ACGIH)
      None of the ingredients is listed.
    · NIOSH-Ca (National Institute for Occupational Safety and Health)
      None of the ingredients is listed.
  · GHS label elements
    Medical Devices are exempt from the labeling requirements of the Globally Harmonized System (GHS).
    · Hazard pictograms GHS03
    · Signal word Danger
    · Hazard-determining components of labeling:
      Sodium Hydroxide
      Sodium Hypochlorite
    · Hazard statements
      Causes skin irritation.
      Causes serious eye damage.
    · Precautionary statements
      Wash thoroughly after handling.
      Wear protective gloves / eye protection / face protection.
Trade name: ChlorCid™, ChlorCid™ V, ChlorCid™ Surf

(Contd. of page 10)

51.0.1

If on skin: Wash with plenty of water.
If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.
Immediately call a poison center/doctor.
Specific treatment (see on this label).
Take off contaminated clothing and wash it before reuse.
If skin irritation occurs: Get medical advice/attention.

· Chemical safety assessment:
This product is composed of dilute sodium hypochlorite, which has a known toxicological profile. The product is only to be used by licensed dental professionals according to its intended use.
