WHITE DONE RIGHT™

Any Indication. Always Opalescence.
Any Indication. Always Opalescence.

Opalescence® PF helps maintain the health of enamel throughout the whitening process.¹

In an in vitro study researchers looked at whether treatment with tooth whitening products with different concentrations of carbamide peroxide or hydrogen peroxide would increase the susceptibility for caries. A tooth whitening product with a neutral pH and 10% carbamide peroxide did not lead to a higher caries risk. In addition, Opalescence tooth whitening gel contains PF (potassium nitrate and fluoride), which helps maintain the health of enamel throughout the whitening process.
