Opalescence Boost 40% in-office whitening is chemically activated, so it doesn’t require a light or laser to whiten smiles. It safely provides excellent whitening results in less than an hour.

- Chemically activated—no light needed
- Two 20-minute applications for a total treatment time of 40 minutes
- Syringe-to-syringe mixing ensures product freshness
- Distinct red color aids proper placement and ensures complete removal
- 40% hydrogen peroxide

* Based on global sales data.
Opalescence Boost 40% in-office whitening delivers visible results in two 20-minute applications. Its convenient syringe-to-syringe chemical activation process ensures product freshness and saves patients from the discomfort of lights or lasers.1
