1. Keep tooth bleaching product away from small children.
2. A dental examination is recommended prior to bleaching. Some discolorations may indicate the need for dental treatment other than bleaching. Porcelain crowns, veneers, and white fillings do not lighten upon bleaching.
3. Only intended for use by those with healthy gum tissue. Gum tissue irritation may result if used in individuals with periodontal disease.
4. This product is NOT for nighttime use.
5. Occasionally, some parts of teeth may bleach faster or less evenly than others. Results may be varied. In approximately 5% of the population, teeth may be resistant to bleaching. Bleaching teeth with large metal fillings may cause the metal color to show through the teeth.
6. Acidic foods/juices may cause sensitivity if consumed shortly after bleaching.
7. Do not use tobacco products or eat while bleaching.
8. Not intended for use by pregnant women. Consult a health care practitioner if you are breast feeding.
10. Do not swallow gel or rinses. Avoid direct contact of the active surface of the tooth whitening product with the gums and/or salivary flow. Product contains peroxide and may contain fluoride; swallowing large amounts can be harmful.
11. Avoid contact with eyes.
